

A Rectangular pallet · C2 contract

$0^\circ \equiv 180^\circ$ | 90° is not equivalent

One rotation relabels the entire cuboid.
No independently reassigned corners.
Center 8 is fixed in every rotation.

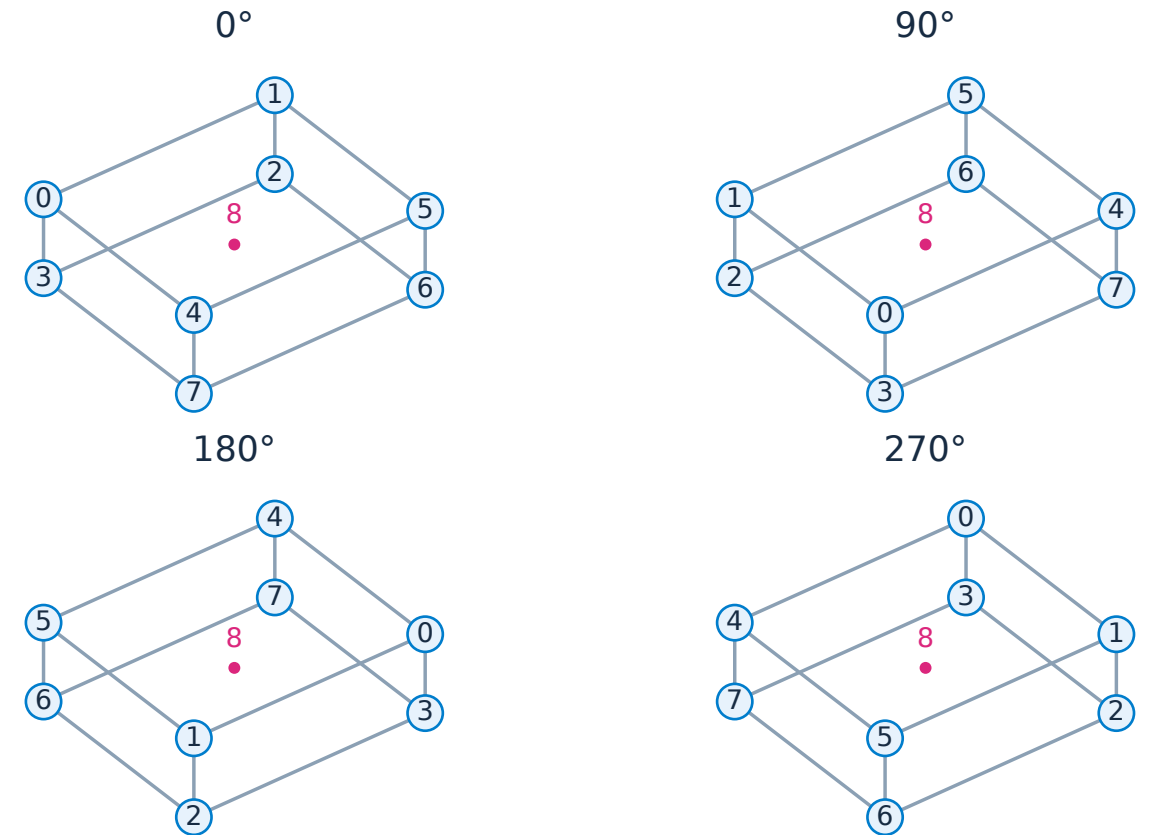

slot $i \rightarrow \pi(i)$, excluding fixed center 8

0°	0	1	2	3	4	5	6	7
180°	5	4	7	6	1	0	3	2

Whole-object valid rotations only; no free pointwise/Hungarian matching.
Equivalence is predefined by the object/task contract, not inferred from dimensions.

B Square pallet · C4 contract

$0^\circ \equiv 90^\circ \equiv 180^\circ \equiv 270^\circ$

slot $i \rightarrow \pi(i)$, excluding fixed center 8

0°	0	1	2	3	4	5	6	7
90°	4	0	3	7	5	1	2	6
180°	5	4	7	6	1	0	3	2
270°	1	5	6	2	0	4	7	3
